Comments: Thank you for the opportunity for the public to engage on FSM 7700 and 7710, which would revise Forest Service directives to update and clarify guidance on management of electric bicycle (e-bike) use on National Forest System lands.

The mountain bike community is responsible for a large part of the natural surface trail infrastructure that exists today on our federal, state and local public lands. Hundreds of organized mountain bike clubs around the country manage thousands of volunteers who work closely with land managers on trail development, trail maintenance, and trail education for all users. Much of this work relies on funding sources specific to non-motorized trail projects.

The proposed directives could jeopardize this funding and increase user conflict if non-motorized trails were to become reclassified as motorized to allow for eMTBs. Instead, call eMTBs what they are... Motorized mountain bikes, and keep them off non-motorized trails.

Thank you for the willingness to engage with the mountain bike community.
