Comments: You know what's sad. Most of you have probably never ridden a eMTB and you're writing laws about them. It the same thing as a regular mountain bike except it's kind of pedal assisted when you're climbing if you choose to turn it on. It allows you to ride longer and have more fun without tiring as easily. There are loads of use cases too for people that have heart conditions and other ailments that would otherwise cause them to not be able to ride a regular mountain bike the eMTBs can solve. Do yourselves a favor and actually try one and then the other before you make any decisions about laws otherwise you're just slowing progression and good for people. FYI it's gonna happen soon or a later, you might as well embrace it now and create directives that actually help preserve our beautiful trails.
