Comments: I feel traditional mountain bikers are more of a danger to those using the trail than someone using an e-bike. As myself and my children were nearly ran over by a mountain biker. Not to mention how they tear up the trails. Both of my elderly parents use an e-bike. This allows them to continue to enjoy the outdoors bicycling, as they would not otherwise. I think its a great idea to allow e-bikes so those who have physical limitations can still do what they enjoy. Just as we all do. This would be a discrimination against them. They would be limited to pavement and cities. We all know the chaos and unfullfillment that brings. I truly hope this will be an option in the future!
