First name: Jake

Last name: Millan

Organization:

Title:

Comments: E-assist bikes are ok, meaning bicycles that you actually have to pedal to make go forward. Ones with a throttle, where you just push a lever are and should be classified as motorized vehicles, and should not be on the same trail as human powered (mostly) e-assist bikes, acoustic (badass) mtn bikers, horses and hikers.

Thank you for keeping these distinctly different modes of transportation separated in our cherished outdoor wild areas.

-Jake
