Comments: Thank you for seeking out public comment on the issue of electric motor bikes on trails. This is where I stop being polite. What the hell? Why must we always be catering to the lazy. E-bikes have no business on bike trails any more than dirt bikes or ATV's. I would rather give up mtn biking completely than share with an e-bike. I am 69 and I take pride in pedaling up a trail. How am I suppose to feel when someone comes up behind me on an e-bike and wants me to move so he can pass. Someone putting out zero effort. I have no problem with them on roads where cars are allowed but that's it. There is no excuse for them to be on trails.
