Comments: I am 77 years old and love to mountain bike. Have ridden for 17 years on trails Arizona and Michigan. Purchased a Ebike in late 2019. Since purchase I have been able to ride more often and more safely on single track areas. The e- assist helped greatly since my age has reduced my stamina, endurance, and technical reaction time. All of my buddies (12) have purchased bikes this year and they too would echo my thoughts. We all work on trails and see no difference in trail condition due to Ebike usage. Strongly support open access to ebikes to all trails that mountain bikes are given access. Older people can now enjoy our great trail system.
