Title:

Comments: I am almost 62 years old. I started tracing road bikes at age 17, I have ridden over 200 miles in a day. I started riding mtbs when they became abundant in the 1980s. I had an aortic dissection 3 years ago and am lucky to be alive. I cannot risk a high heart rate while experiencing the joy of straining up a hill any longer without the risk of death. E bikes give me a boost when needed so that I can continue to enjoy these spaces that I would otherwise no longer be able to access.
