Comments: Having used an ebike to for transportation for years I have some experience with them. I have not used an emountain bike as of yet, my body still allows me to ride the level that I want under it's own power. I do understand their place and think that class 1 ebikes should be allowed on the same trails as they allow people who would not normally be able to access areas more freedom. I also understand that keeping the non-motor vehicles standing of a trail is vitally important for trail impact and also user conflict. Having distinct clarification for level 1 ebikes would be useful in my eyes.
