Comments: Class 1 Electric mountain bike With just pedal assist and limited power should be treated as regular mountain bike. the limited power compares to Someone pushing you from behind when you're riding and the speed is limited to slightly faster than human jogs (20mph), so I don't understand why people compared it to a dirt bike all the time.

Class 1 electric bike helps Promotes healthy and active lifestyle, with zero emission and no environmental impact. You should learn from EU countries where various studies has been conducted and the industry is thriving.

To prevent abuse (Such as class 2 and 3 ebike disguising as class 1) , consider Issuing Annual permits and inspection. Anyone without a visible (and valid tag) should be fined. The permit fee can also be used for the maintenance of the trails/parks.
