Title:

Comments: No motorized vehicles of any kind should be allowed on public trails ... This will eliminate the need to categorize and identify the many different motor assisted bikes, unicycles, off-road skateboards, and other contraptions I've recently witnessed endangering the lives of others such as hikers, bicyclists, runners, and young children attempting to use trail systems throughout Middle Tennessee. The only exception should be someone with a physical disability rendering them unable to maneuver the trails without the assistance of a specially designed vehicle used for mobility.
