First name: ty

Last name: nelson

Organization: East Fork Bikes

Title:

Comments: Electric assist mountain bike are not motorized dirt bikes. Any one who thinks they are the same and ride the same way and affect the trails in the same way has zero practical knowledge of either. It is just a mountain bike and behaves the same way. A world cup level xc rider on a regular mt bike will put more torque to the rear wheel and ride the trail with more speed than a 70 yr old on a class 1 ebike
