Comments: Please let me start off by saying I am not against e-bikes. If they are used correctly by ppl that need them to get into the sport that would normally not be able to ride the trails. I have seen alot of ppl that have them be very disrespectful to hiker and even mountain bikers. Also they are doing more damage to the trails due to the extra weight bigger tires and faster speeds. Also my biggest fear is that they have and will continue to possibly destroy all the hard work that so many have fought for getting us access to these areas. In my opinion they are motorized bikes that can and will be modified to go faster and that is where the main problem starts. So in the interest of the mtb community I do not believe that they should be allowed to access the trails that mountain bikers have worked for so long to obtain access to these lands.
