Comments: I am opposed to ebikes on the trails with hikers. They need their own trail system. My experience with even non-motorized trail bikes is that they tear up the trails quicker and the riders generally act like they have precedence over other users by forcing you off trail by speeding down the middle. They act as if they don't have brakes and others should just get out of their way. Bikes scare wildlife away and I can't imagine how a horse would react if passed by one. It's a BIG NO for me...
