Title:

Comments: Please do not allow ebikes into the forests with anything less than a motorized designation. Our trails are far, far too fragile to take on the increased load of erosion and impact. In the subject of our national scenic trails, there is absolutely NO PLACE for any bicycles, motorized or not. The same should also be said, and must be enforced, regarding intrusion into our Wilderness areas. Keep the trails as they are. Permit bikes where allowed, keep them out of Wilderness, and most of all, keep ebikes designated as motorized.

From,

A USFS employee that maintains trails in and out of the wilderness when not suppressing wildfire. I would consider myself a subject matter expert.
