Comments: I object to E-bikes on Forest Service Trails due to the fact they are motorized vehicles and the increased speed would be detrimental to hikers and stock on the trails. While hiking in Idaho in I was almost knocked off the trail by two mountain bikers who rounded a bend going very fast. I am thankful I was hiking the inside of the trail or I might have lost my life. E-bikes can go even faster and I have tried them so I know. I am sure you have heard plenty more objections.

Thank you for allowing me to comment
