Comments: Thank you for considering e bikes for access to more trails. E bikes are allowing people with physical conditions that normally couldn't ride a regular bicycle to get out and enjoy the outdoors. My wife and I both have e bikes (class 2) and have been disappointed during our travels by the trail restrictions. We use the pedal assist selector to help us travel up hills and the throttle to help us get started from a dead stop. I feel class 1 and 2 should be treated the same.
