Comments: I support class 1 E-bikes being used on non-motorized trails. After owning one this season I can say that this is NOT a motorcycle and is much more closely related to a traditional bike. I was constantly surprised at how much effort I still needed to exert while riding my class 1 e-bike and made me realize that you still need knowledge of how to ride a bike properly to ride an e-bike. Because they do not have throttles they do not damage trails the way dirtbikes do. You have to be pedaling in order to make the bike move forward. I am in full support for allowing access to e-bikes on all trails.
