Comments: I have been mountain biking for over 20 years and as much as I appreciate technology, I OPPOSE the use of eBikes on mountain bike trails. I feel it is dangerous for the user and other mountain bikers around them on the trails. Most current mountain bike trails are not set up to be ridden by eBikes. They can erode trails that have been worked on very hard by volunteers. And I don't think those trails should be changed either to accomodate eBikes. That would honestly take the challenge of the trail for mountain bikers. Thank you
