Comments: E-bikes are motorized. They don't belong on motorized trails. There are tens of thousands of miles of trails and roads on public lands that can be used by e-bikes now, there is no need to give them access to existing non-motorized trails. Non-motorized trails provide an experience that's qualitatively different from motorized trails, and e-bikes, due to their higher speeds, will negatively impact that experience. I know they would be detrimental to the enjoyment of trails that I now use that do not allow motorized vehicles. As an example, my wife and I regularly take our dogs on outings on the trail system at Haviland Lake, north of Durango. E-bikes would ruin those hikes.

Please do not open any non-motorized trails to e-bikes.
