Comments: Why are we creating an issue , rules, regulations and cost where there is none! Leave well enough alone ...a mountain bike is a mountain bike whether or not it has a battery....I have not exany problems with any mountain bikers weather electric or not.

By driving a division into Mtn bikers with separate rules and enforcement for bikers and bike trails...you are simply going to increase problems....and cost! Just stop over regulating what doesn't need regulation!

My prediction is that over 80% of all mtn bikes sold will be batteries! The non ebikes will quickly becomes a small minority.
