Comments: As an equestrian, it is already a challenge when dealing with mountain bikers who suddenly appear in front of us, or come up behind us, startling the horse. Having motorized bikes on trails is a terrible idea. They're quieter and can go much faster, making them incredibly dangerous to horse and rider, other mountain bikers, and walkers/hikers. They also pose a threat to wildlife because of ease of access into deeper areas. Seriously, what an absolutely terrible idea. Sounds like injury/death lawsuits just waiting to happen.
