Title:

Comments: E bikes can have speeds of 45 MPH and higher. Unfortunately you can not expect the E bikers to police themselves on speed and safety all of the time.

E bikes should be treated as motorized dirt bikes unless they are speed limited to a reasonable speed (10 or 15 MPH?) to be used on the same trails as hikers and other bicyclists. E bikes should not be allowed on trails that have been marked "Non-motorized vehicles". Otherwise, you endanger hikers and people on regular bicycles.
