First name: Wayne
Last name: Thacker
Organization: Rocky Mountain Elk Foundation Virginia State Leadsrship Team
Title: Volunteer
Comments: The Virginia State Leadership Team of the Rocky Mountain Elk Foundation strongly supports the Bobblets Gap Vegetation Project. We applaud the GWJEFF and the Glenwood & Pedlar Ranger Districts for efforts like this project which will help restore GWJEFF forest health and resiliency. We particularly appreciate efforts to restore regenerating young forests through timber harvests. Table 2 in the Scoping demonstrates clear need (which is mirrored by the overall GWJEFF condition). This project's implementation will help restore dynamic diversity and create critical wildlife habitat for hundreds of species that rely on early successional growth. Thanks for this work and please keep us in the loop.
