Comments: I frequently use non motorized trails with my horses and mules and sometimes just hiking. I think electric types of transportation including bikes should be limited to multiple use type trails. After all, they have a motor. In addition, they move to fast and are a danger to everyone on the quiet trails because of their silence and speed. If a horse spooks because of the electric bike, both the equestrian rider and the bike rider could be badly hurt or killed. Electric bikes have no place on non-motorized trails!
