Comments: I think e-bikes are great in that they get people outside and exercising who might not do so on a manual bike. HOWEVER, I think trails are no place for motorized vehicles. E-bike riders often zoom past me, a hiker, without so much as an "on-your-left" warning. I am a senior who enjoys trail hiking and have almost been knocked down by e-bike riders more than once.

There are plenty of streets and roadways for motorized vehicles. I think there should be places for hikers to enjoy the wilderness where any kind of motorized vehicle is prohibited.

Thank you!
