Comments: Thank you for the opportunity to let the public share our opinion about class 1 e bikes on federal trails. I am a volunteer trail builder for the blm and I own both a conventional mountain bike and a class 1 ebike. Obviously class 1 e bikes growth has exploded and I see so many great things about them. They allow many different levels of riders to ride together, along with people who have physical limitations that would never be able to access particular trail systems.

As a trail builder, I haven't seen any cause for concern about wear and tear from class 1 e bikes. What I have seen is just how useful of a tool they can be when building trails.

Thank you for your time
