Comments: I strongly oppose the decision to allow ebikes to be allowed on trails designated for non motorized vehicles. By allowing any class of ebikes to be classified as non motorized vehicles, you will be putting more pressure on already stressed wildlife, degrading the biodiversity of plant life in trail corridors and endangering legitimately non-motorized users (hikers, equestrian and bicycle riders). There are non motorized options for people with limited mobility, and by opening up these non motorized designated wilderness areas to ebikes, you will be setting a precedent that will allow for more destruction of the rapidly shrinking wilderness we have in this country.
