Comments: To whom it may concern,

As an avid hiker and backpacker, I am writing to express my concern with allowing e-bikes on nonmotorized trails. Unlike standard bikes, e-bikes easily gain speed up and downhills which create more hazardous conditions for other trail users and for themselves. E-bikes should continue to be allowed on motorized trails but please keep our non-motorized trails safe and sacred to hikers, mountain bikers, and equestrians.

Thank you.
