Comments: Hi,

I'm glad you are considering allowing e-bikes on national forest lands, but I think the classification needs to be crystal clear and make sense.

Pedal power class 1 e-bikes should be considered NON-MOTORIZED transportation and fall in the same category as normal bicycles.

The bigger faster class 2&#3 ebikes should be considered motorized.

Just make sure to get this right so equestrians, hikers, and mountain bikers can continue to share the same trails.
