First name: Carrington

Last name: Goodman

Organization:

Title:

Comments: The natural trails should have only foot traffic by human or horse.

Electric bikes create an unnatural environment, the very thing we desire in hiking or trail riding along the natural trails. Electric bikes will lead to other forms of movement and they are not all quiet as stated. Trails should be a refuge for quiet and sparse movement. Electric bike will also scare the hell out of a horse and people will get hurt. NO to electric bikes! WALK!!!!
