Title:

Comments: NO E-bikes should be allowed anywhere unless the area is designated for motor vehicles. I know the E-bike militia is loud, however this is about safety.

Depending on conditions, I ride my road bicycle on level, paved paths/roads between 17 - 20 mph. When I am mountain biking and climbing, my speed is 5 - 8 mph. An E-bike is usually ridden by a person with minimal bicycle skills. When this person is operated in traffic with much higher speeds than the flow, this creates multiple situations.

I know many people will disagree, but facts are facts. E-bikes MUST not be allowed on paths/trails unless the area is approved for any, all motorized vehicles.
