Comments: Communities around the country and the world have made many accommodations for bicycles and e-bikes.

Please, let's keep the National Forests free of e-bikes. They create noise, they go too fast on some trails, they make ruts in the trails.

We, the people who enjoy the outdoors still need places where we can hike, enjoy nature in a quiet and slow paced arena.

My Army disability is lung damage which means there are many places I can no longer access - many trails are still available to me and I would like them to be bicycle free.

Thanks!
