Comments: Motorized is motorized regardless of the type of power. Having a mix of all types of trails is important. People can choose to use whichever trails they are most interested in. Opening foot travel only trails to e-bikes makes no sense.

USFS and BLM have a hard enough time enforcing current rules without adding to the confusion. As a hunter who chose to utilize "single track" (motorcycle only) trails this season, I was extremely disappointed to find both ATV and UTV tracks on the trails this year.

I wish there was more effort put into patrolling and enforcing the rules, instead of creating opportunities for further abuse.
