Title:

Comments: I am an avid hiker and am vehemently opposed to allowing ebikes on the trail. Not only will this create an added danger and disruption for hikers, but for wildlife as well.

The extra wear and tear of the trails must also be considered.

The forests, mountains and lakes are supposed to be a place to get away from motorized noise and technology.

Allowing these on the trails would significantly alter the wilderness experience forever and deprive current and future generations the true experience of the outdoors.

I strongly urge you to not allow ebikes ,like any other motorized vehicles, on trails.
