Comments: Please do not allow e bikes on non-motorized trails. As an avid equestrian e-bikes are an invasive to the peace and tranquility of trailriding. These trails were built and are maintained by equestrian volunteers and should remain so. Additionally, there is a trend happening that other trail users are demanding that horses can't use the trails that were originally made for horse travel-in essence equestrians are losing trails and ebikes will contribute to this trend. Lastly, fast moving silent e-bikes and horses on trails are a very real danger to equestrian riders and will increase the risk for potentially severe injury to the horse and rider while the e biker just whizzes by never even stopping to see if is injured or not! This behavior has already been share in trail stories. Please consider the safety of all trail riders and hikers! Please no e-bikes on non-motorized trails!!
