First name: E A

Last name: Gierman

Organization:

Title:

Comments: E-bikes should not be allowed to traverse pedestrian and equestrian use trails as they are a motorized vehicle and would cause substantial damage to the trails and can cause injuries to the hikers and Equestrian that already use and take care of those areas. They are silent and use speeds that do not mix well with most terrain in these areas. Mountain bikes are already in use where they do not need to be. They as well as the e-bikes need to be used on paved or gravel roads already approved for their use
