Title:

Comments: We believe without a clear and concise enforcement mechanism, no motorized vehicles should be retroactively allowed on non-motorized trails. This is opening Pandora's box and will surely end up like the side-by-side debacle did on the motorized side.

It is literally IMPOSSIBLE to to differentiate between class 1, class 2 and class three at a glance and even difficult up close for a trained individual.

A workable solution is to propose "from conception" trails suitable for eBikes, NOTY to allow these motorized vehicles retroactively on non-motorized trails. This will surely harm our current ad future access opportunities.
