Comments: I wish to see e-bikes be allowed anywhere that normal bikes are allowed. These bikes have made it possible for my stroke survivor husband to get out in the world that is shut off to him otherwise. We are former equestrian riders and don't see as these as anymore intrusive than the normal bicycle. Both are dependent on public education for use in mixed areas. After his stroke we have to settle for the pony & cart or e-bike and I can tell you the pony cart usually causes more of a issue with the saddle horses than the quite e-bike.
