Comments: E-bikes should be allowed wherever regular bikes are allowed. Otherwise, it's just discrimination against the least fit of us and discouraging for a great part of the population that would like to enjoy the outdoors on a bike, but cannot do it on a regular bike for a multitude of reasons. E-bikes are silent, good for the environment and good for one's health. That is the bottom line. A vote against e-bikes is a vote against the future and against a healthier nation.
