Comments: Thank you for the opportunity to comment.

I do not believe it would be in the best interest of any parties to allow e bikes on trails.

Speaking as an equestrian it is a bad mix.

There are so many uncertainties with such a large animal. Because horses have a "flight" mechanism instilled in their DNA , that certainly is their defense mechanism when confronted with danger. It is bad enough when approaching regular bikes.

Allowing bikes and horses together is a very bad idea,

Solution: How about creating separate trails?

Thanks
