Comments: Reviewing this, non-motorized trails need to be left as is. Once a compromise is negotiated, there will be a second, a third, and the trail will no longer be non-motorized.

There are more than enough trails for motorcycles and ATVs. Those provide ample opportunities for enjoyment of motorized vehicles.

Please keep non-motorized, non-motorized. Please do not allow us down a path not compatible with maintaining non-motorized and motorized trails separate.
