Comments: E Bikes as everyone calls them are made under 3 classification. I would like to see the forest service look at these classifications. I would like to see the trails open up to class 1 and 2 to the same as regular bicycles. Ebike class 3 and greater could have designated areas like motor bikes. E bike and pedal assist are two different things. Ebike has very little peddle assistance more like motor bike. Class 1 and 2 have very little differences than a regular mountain bike. The motor only assists you on how hard you peddle. It is a awesome technology that we should embrace. Let's let the young and old experience the outdoors. Let's get off the TV and ipad. Let's use a technology that makes us happy instead of sad gloomy stuck inside.
