Comments: I do not support eBikes on all USFS trails. Some make sense, such as directional uphill and downhill. But multi use trails are a hard NO. I've been run off the trail by eBikers who are unwilling to yield. Or they pass dangerously on a tight climb that wasn't designed for 18mph.

If eBikes are so popular maybe they can lobby for and build their own trails, designed for eBikes. But let me ride USFS trails in peace.
