Comments: As a general comment I feel that E-Bikes are motorized vehicles and any planning for use on NFS lands should be done for their use in areas or trails planned or being considered for motorized use under the regulations for travel planning.

In relation to the changes as proposed to FSM 7700 and FSM 7710 I have read and considered the suggested changes. For FSM 7700 specifically 7702 objectives the changes proposed to definitions covers E-Bikes. FSM 7702 8 talks about the need for uses and public needs for access. Changes and additions to 7703.13 and 7703.14 cover trails and areas of use for E-Bikes. Changes proposed in 7705 defines E-Bikes and what is considered an E-Bike. Proposed changes in FSM 7710 gives definitions of various types of E-Bikes and categories of trails open to E-Bikes which adds information for travel planning for this type of vehicle.
