Comments: IF the only ones using the e-bikes were those with disabilities I would tend to agree to letting them use trails....but, that is not the case! NO to e-bikes! They are dangerous to hikers and horseback riders. You can NOT hear them and they already go too fast. They admit to going faster! DANGEROUS!

Why are you trying to promote this? why not promote traditional uses? Make it easier for traditional uses? Open up more trails and campgrounds to take pressure off areas that are overused now?

The trails for e-bikes are NON-MOTORIZED only trails. e-bikes have motors...hence they are NOT ALLOWED!

It will cost a TON of money to change signage.

Cost of trail maintenance will sky rocket.

Get back to doing what you should be doing! Harvesting trees and providing NON-motorized use of forests for recreation.
