Comments: Allowing motorized e bikes on trails

Greatly diminishes the quality of experience for all

Other users. The noise and speed is harassing to wildlife.

The safety of other trail users is compromised with the speed

In which these bikes can travel. As a mountain biker and hiker

these trails would become unsafe. I have also been on many

equestrian trails as a hiker and these e bikes pose a great danger

To them as well. Please keep e bikes OFF all hiking and equestrian and / or mountain

Bike trails.
