Comments: Hello Forest Service,

I have been an active hiker in the Colorado Mountains since 1982 using the Forest Service trails. I feel strongly that my quiet and peaceful experience of travel should not be changed by allowing e-bikes a different classification than motorized dirt bikes for example. I do NOT want an e-bike whizzing by me at 20 mph downhill and I need to get out of the way.

It is very different sharing the trails (and I have to) with mountain bikes. They like me are working their hardest to achieve their goal. Secondly there are many trails already designated for motorized vehicles that e-bikes can use. Ebikes are motorized vehicles and should be regulated as such.
