Comments: I have 5 mtn bikes & one ebike

Calling an ebike "motorized" insinuates/suggests/implies it's similar to a motorcycle-it isn't.  
It's more like a mtn bike with uumph-quite & helpful.

I am pretty healthy (for 68 yrs old) & ebiking doesn't & hasn't replaced riding my regular mtn bikes. the ratio of riding my mtn bike to riding my ebike is 10-1...For every 10 times I ride my regular mtn bike I ride my ebike once. My healthy mtn bike friends claim similar ratio numbers.

For people with knee problems, health issues or older people ebikes are heaven sent.  
They can now ride instead of sitting at home wishing they were in perfect health,  
24 yrs old & in possession of an abundance of energy

Even though I rarely ride my ebike I support ebike access where ever regular mtn bikes are legal. We live in "Bless-ed times"
