Comments: I am providing public comment on the motion to allow motorized electric bicycles on the trail. This is a bad idea for our forests, for our wildlife, and for ourselves. I am against this initiative. They are also likely to threaten grazing livestock, and endanger our horseback riders. This is a bad idea, and I beg you to reconsider. Non-motorized trails are sacred and should not be changed. We go up onto the our Forests to get peace and sanctuary, please do not take this from us! Do not ruin the quiet of the forest. This is a huge mistake allowing this to happen. There are motorized trailers people can enjoy everywhere. We need to protect our forests from these kinds of initiatives.
