Comments: Thank you for the opportunity to comment. I am 49 and I love my class 1 e-bike. Because of my bad knees, I can no longer ride a "normal" mountain bike. The class 1 pedal-assist gets me out and enjoying the trails again. Please consider allowing the class 1 e-bikes on trails. It is battery-fueled, and not classified as a motor. We e-bike riders are not a threat. I'm sure if you check the demographics on who is buying these class 1 e-bikes, they're my age or older. We are not out shredding the environment. We are just out for a nice ride on the trails. Please consider allowing us to continue to enjoy those trails. Thank you.
